

Pet Owner + NGO Module Updates Summary

Functionalities Added

1. Registered NGOs now load dynamically in Pet Owner NGO panel.
2. NGO fetch fallback added: profiles -> users, so newly registered NGOs appear.
3. Volunteer registration flow added with details + ID proof upload.
4. Volunteer ID proof upload API added (/api/upload-volunteer-id-proof).
5. Donate action updated to Rs style.
6. NGO card now has Donate, Volunteer, Adopt, and Pet Handover actions.
7. Adopt flow changed to 2-step: NGO pet profiles -> adoption form.
8. Adoption form stores applicant details, verification, and passport request option.
9. Pet Handover form simplified: owner details + select which pet to handover.
10. Handover flow includes pet passport viewing/sharing context from selected pet.
11. Request data is saved in DB tables for volunteer, adoption, and handover.
12. Supabase migrations were created and pushed; remote DB is up to date.

UI Updates

1. NGO section UI switched from hardcoded cards to DB-driven cards.
2. NGO action row redesigned with clear button grouping.
3. Donate button label/icon moved to rupee context.
4. Volunteer modal form UI with ID proof preview added.
5. New NGO Pet Profiles modal added before adoption.
6. Pet profile cards include image, type, breed, age, and health summary.
7. Adoption modal shows selected pet profile at top.
8. Adoption modal includes request pet passport checkbox.
9. Handover modal simplified to minimal owner + pet selection form.
10. Handover modal includes quick View Pet Passport action.
11. Loading, empty-state, and schema-warning UI states improved.
12. All new modals use consistent responsive overlay/dialog styling.
